

PA2464 Power Amplifier IC *Advance Information*

Princeton Technology Corp. reserves the right to change the product described in this datasheet. All information contained in this datasheet is subject to change without prior notice. Princeton Technology Corp. assumes no responsibility for the use of any circuits shown in this datasheet.

Description

The PA2464 is a Power Amplifier (PA) IC as the final RF amplifier for handheld applications in the 400MHz to 480MHz band.

Features

- ◆ Single 3.5V to 6V Supply Voltage
- ◆ +36dBm Output Power
- ◆ 75% Efficiency
- ◆ 8-pin SOP(FD) package (5mm x 4mm)

Applications

- ◆ FRS, GMRS Handsets
- ◆ Commercial and Consumer Systems
- ◆ Portable Battery-Powered Equipment
- ◆ Long distance Remote Control
